

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 30, 2007

Water Body Under Evaluation:

Water Body ID #: 0520
Name: Rattlesnake Creek (Class C)
Length of Segment: 3.0 miles
County(ies): Audrain

Use Attainability Analysis (UAA) Study:

UAA ID #: 0485
Submitter: MEC Water Resources, Inc.
Date(s) Conducted: May 21, 2007
Date Received: May 28, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments: The UAA survey was conducted in May 2007 and no WBCR was observed.
No interviews were conducted during the survey.

Is the evaluated use attainable? ☐ Yes ☐ No
Comments: Only 1 site was evaluated on the 3-mile long segment. To successfully rebut the presumption of whole body contact recreation, the Recreational Use Attainability Analysis Protocol requires a minimum of three sites. More investigation is needed to reach a determination about WBCR. The committee therefore deems the UAA to be inconclusive.

Committee Recommendation: ☐ Add Use ☐ Retain Use ☐ Remove Use
☐ Modify Use ☒ Inconclusive

Committee Members: Donna Menown, Anne Peery, Priscilla Stotts
